## Project Details:

<b>Project#1</b>	<b>Portal Project</b>
------------------	-----------------------

**Client** : MPS@DC Madhya Pradesh  
**Work Duration** : September 2021 To July 2023  
**Team Size** : 12  
**Technologies Used** : Spring, Hibernate along with JPA, Primefaces along with JSP  
 Java Script, Junit, Soap webservises, Log4j, Tomcat, MySql server,

**Description** : The functionality of this project is covering the insurance coverage details of the Policy owner. There are two portals one is Agent web and another policy owner web. Agent application is maintaining Agent related information like agent registration and agent can sell policy to policy owner and agent can see details how many policies sold and in that how many policies inforced and how many policies are pending which was not inforced. Agent can see commission statement for the time period. If policy owner want complete details for policy so agent can run inforce Illustration for the particular policy and provide details to policy owner. Agent can perform the operation like email change password change and address changes. Policy owner portal owner can register on portal through policy number and SSN (Govt ID proof ). After completion of registration owner can details of policy. If owner is not paying continuously premium so after some time policy will be inactive status and after the status of policy will be lapsed status. If owner want to surrender policy so owner can surrender the policy. As a customer support we have another application Admin tool. If any agent got block so agent unblock through Agent Admin tool

application and for policy owner customer care have PO admin tool.
